At the heart of the system are rugged tablets or mobile devices assigned to security guards. These devices are equipped with GPS modules that allow real-time location tracking. Guards use these devices during patrols, checking in at designated points, and recording their movements. The GPS data is transmitted to a centralized server, creating a live map of patrol routes and coverage areas.

- Digital Checkpoints and RFID Tags

To ensure thorough patrols, checkpoints are strategically placed throughout campus. Guards scan RFID tags or QR codes at each checkpoint using their devices, confirming their presence. This process not only verifies that patrols are conducted as scheduled but also timestamps each check-in, providing accountability.

- Surveillance Cameras and Sensors

The system integrates surveillance cameras at key locations, which can be remotely monitored and controlled. Additionally, environmental sensors such as motion detectors, door/window sensors, and alarm systems feed data into the platform. These sensors help detect unusual activity, unauthorized access, or emergencies, triggering alerts for immediate action.

- Centralized Management Software

All hardware components feed into a centralized security management platform accessible to security supervisors and administrators. This software offers features like live map visualization, incident logging, reporting tools, and communication modules. It provides a unified dashboard for overseeing patrols, incidents, and system health.

How the UPRM Security Monitoring System Works in Practice

Real-Time Patrol Oversight

Security supervisors can view live locations of guards on a digital map, ensuring that all areas are adequately covered. If a guard misses a checkpoint or deviates from their route, the system generates an alert, prompting intervention or rescheduling.

Incident Response and Reporting

When an incident occurs—be it an unauthorized entry, suspicious activity, or a medical emergency—the system allows guards or monitoring personnel to log the event immediately. Live camera feeds can be accessed to assess the situation, and alerts can be sent to law enforcement or emergency services if needed.
